

## HASTY SEARCH Kit™ – the all-in-one search and rescue kit

The Hasty Search Kit™ has been specifically configured for urban search and rescue teams, “enhanced” rescue squads, regional task forces and SUSAR teams who are seeking a high quality, easy to use, cost effective, all-in-one technical search system for their standard equipment cache. The Hasty Search Kit™ comes complete in one easy to store case and is designed to be both easily transportable and rapidly deployable anywhere disaster strikes. The kit includes the Delsar® LifeDetector® Mini system that provides seismic detection of victims and the all new SearchCam Recon III for visual search and location operations.

The equipment contained in the Hasty Search Kit™ is cross compatible with other members of our rescue product family: SearchCam 3000™, and Delsar® LD3 LifeDetector®. Batteries and chargers are completely interchangeable to assist with logistical issues such as battery management during full scale deployments or events.

### Designed for following uses and industries

### TECHNICAL DATA

#### KEY BENEFITS

- Ruggedized camera
- Seismic victim location abilities
- Heavy duty single storage case
- Rapid to deploy
- Interchangeable batteries
- Extremely cost effective
